

# Wind Funnel

Today has been a devastating day for some people as many witnessed the destruction of an enormous Level 3 tornado. Not many natural disasters happen in this area so it is very unusual to see anything like a tornado uprooting trees and destroying homes. This tornado is said to be traveling at 50 miles per hour and is making its way down south. The reports say there were 89 people injured, 4 killed, and 250 people without homes and.

## Couldn't Believe My Eyes

A lawyer and resident of where the tornado touched down - William Garrett - said he saw the tornado touch down at a gas station near his house where he said " began to cause panic for many people on the block. There would be people knocking on random folks' doors begging for shelter. At the same time I couldn't help but be amazed by the natural cause. I took my grandkids and wife and we all hid in the basement and waited for the wind funnel to go away."

The wind funnel doesn't seem to be slowing down as it makes its way from Michigan to Ohio destroying anything and everything in the process. If you live in Ohio or the path of the tornado be sure to move you and your family down to the basement. If you don't have a basement, take yourself and your family members to a nearby shelter or go to another family member's house to seek shelter. Make sure you bring dry food in case it gets worse
